495	3c Orange Brown, Brownish Carmine, Reds, Claret (10, 11, 11a). A highly specialized study of shades for the entire period the stamp was current. There are nine Orange Brown #10, incl. Copper Brown, there is a single example of the rare 1856 Orange Brown and three Experimental Orange Brown, used late in 1851. The other shades run the gamut from true Brownish Carmine to the scarce deep Claret or "Plum" as it is often called. Each basic shade and its nuances are identified and two of the six album pages are beautifully written-up with the others, neatly planned, with lettering in light pencil. This is an unusually comprehensive collection and quality is, for the most part, Fine. A few bear interesting cancels, such as the small Boston "Paid" and N. Y. "Slugs". Owner has stated to us that all of the shades have been classified and verified by Dr. Amonette, recognized by serious students as a leading specialist in this interesting stamp. This is a very attractive lot, comprising 58 stamps in all and would	

	be extremely difficult to duplicate at any price. We consider our estimate of value to be conservative when one considers the effort expended in assembling such a collection	E. X
