EXTREMELY FINE EXAMPLE OF THE SCARCE PLUM SHADE OF THE IMPERFORATE 3-CENT PRINTED IN 1857.

Chase states that the Plum shade was produced in early 1857, shortly before the introduction of perforated stamps. Chase compares the shade to an intermediate shade of Scott 280 of the 1894 Issue. Some students believe that no more than 50 examples are known.

Chase plating note on back. Accompanied by small photocopy from Dr. Amonette identifying this stamp as the Plum shade. We believe this shade to be undercatalogued in Scott at \$400.00. .... E. 1,500-2,000

EXTREMELY FINE MINT NEVER-HINGED EXAMPLE OF THIS RARE ROTARY-PRESS PRINTING.

At the beginning or end of a coil-stamp print run from the 170-subject rotary plates, some leading or trailing paper was left over that was too short for rolling into 500-stamp rolls. In 1919, the Bureau devised a plan to salvage this waste by converting the stamps from coil stamps into sheet stamps. This was accomplished by cutting the sheets into panes and putting the panes through the flat-plate perforator in use at the time, giving the stamps perforations on all sides.

Since Scott 539 was put through two different perforating machines of differing gauges at different times, most of the stamps are off-center. The stamp offered here has remarkably choice centering and ranks among the finest of Mint N.H. examples.
