## 1851-56 ISSUE

74

- 74 ★ **1c Blue, Ty. II, Plate 3 (7).** Position 3L3, original gum, lightly hinged, large margins, intense Prussian Blue shade on bright fresh paper

EXTREMELY FINE GEM. THE ONE-CENT 1851 ISSUE FROM PLATE 3 IS RARE IN ANY CONDITION. THIS SUPERB STAMP IS ONE OF THE FEW ORIGINAL-GUM EXAMPLES IN EXISTENCE.

According to Ashbrook and Neinken, Plate 3 is believed to have been made in March or April 1856, possibly to replace the defective Plate 2 and/or to meet the increased demand for stamps concurrent with the April 1855 change in postal regulations requiring prepayment of postage. For an unknown reason — possibly a severe defect that arose in the plate — very few stamps were printed from the new Plate 3 before it was retired, and surviving examples are rare.

Plate 3 comprised Type II stamps exclusively. Early impressions are found with a distinctive mottling or ink film caused by ink remaining on the plate after it had been wiped. The stamp offered here does not have the mottling characteristic, and, therefore, it must come from a later impression after the surface became more polished and uniform. This stamp does possess the remarkable Prussian Blue color found among Plate 3 stamps, and it can be plated to Position 3L3 with absolute certainty (note the double guide dots at top right, a distinctive feature of top-row Plate 3 positions).

With respect to Plate 3 stamps such as this, which can be plated with certainty, Neinken wrote (p. 220): “The fact is that in this day and age, if a stamp has been plated as a Plate 3 position, and this plating is substantiated by a knowledgeable student or a Philatelic Foundation certificate, the Plate 3 stamp realizes far more in auction sales, or when purchased from a dealer, even though it has no definite Plate 3 characteristics. There is only one certain way to identify a stamp as being printed from Plate 3, and that is to definitely plate the position.”

Plate 3 stamps have always been highly respected and enthusiastically collected, especially examples that show one or more of the distinctive features (surface cracks, mottling or Prussian Blue color). However, searching thru past sales of major 1c 1851 collection — Chase, Emerson, Fleckenstein, Newbury, Ishikawa and Cipolla — we are unable to locate another original-gum example that comes even remotely close to the condition of this stamp. In fact, we can only find an unused no-gum example, ex Emerson and Fleckenstein, that was graded Very Fine. The Chase collection had only two unused examples, neither with gum, and the 1925 Chase sale catalogue assigned great significance to Plate 3 stamps.

With 1999 P.S.E. and 2001 P.F. certificates, both identifying the position as 3L3. ....

EXTREMELY FINE APPEARANCE. AN EXCEEDINGLY RARE PROOF SHOWING EXPERIMENTAL BEMROSE ROULETTES AT TOP. A WONDERFUL HISTORICAL ARTIFACT OF THE EXPERIMENTS LEADING UP TO THE PERFORATING OF UNITED STATES POSTAGE STAMPS.

In October 1856, Toppan, Carpenter purchased a machine from Bemrose & Sons of Derby, England, which could either perforate or roulette postage stamps. At the same time, Toppan, Carpenter sent two full sheets of proofs (obliterated with penstrokes) to the manufacturer so that the cylinder and rouletting wheels could be adjusted prior to shipment of the machines to the U.S. However, the proofs were unsuitable for this purpose due to the fragile nature of the India paper, as is evidenced by the uneven rouletting at top.

VERY FINE TO EXTREMELY FINE. A SUPERB COLOR CHART OF THE IMPERFORATE 3-CENT 1851 ISSUE AND A VALUABLE RESOURCE FOR ANY STUDENT OF THE ISSUE.

The 3c 1851 Issue comes in a tremendous range of shades and colors. Dr. W.F. The color chart offered here is designed in the same format (by year) as the master color chart compiled by Dr. Carroll Chase, the leading student of the issue. The stamps in this chart were each physically matched to those on Dr. Chase's master chart. ....Not illustrated E. 4,000-5,000

VERY FINE. THE ONLY RECORDED MULTIPLE OF A BISECTED STAMP IN UNITED STATES PHILATELY. A TRULY REMARKABLE COVER PREPAID AT THE DOUBLE 3-CENT DOMESTIC RATE WITH STAMPS PREPARED FOR THE ONE-CENT RATE.

The census of 3c 1851 bisects published by Stanley M. Piller in *The Chronicle* does not contain this extraordinary cover. The sender obviously cut vertical strips of 3c stamps precisely in half, in anticipation of mailing circulars at the 1c rate. However, in this case, the sender used a strip of four to prepay the double 3c rate, and the postmaster at Milton accepted the "four halves equals two stamps" principle. EXTREMELY FINE. A SUPERB ORIGINAL-GUM EXAMPLE OF THE PERFORATED 10-CENT TYPE III 1857 ISSUE.  
The first perforated 10c stamps produced by Toppan, Carpenter from sheets printed from Plate 1 are notorious among collectors for their poor centering. They are also very scarce in original-gum condition because, unlike 10c Plate 2 stamps (Scott 35), there were no supplies on hand in 1861 when the issue was demonetized due to the outbreak of the Civil War. An original-gum 10c 1857 stamp — Types I, II, III or IV (all on Plate 1) — in this choice condition is a rarity.

A VERY FINE APPEARING USED EXAMPLE OF THE SHORT-LIVED 90-CENT 1860 ISSUE.

The 90c saw limited use because of the rates in effect, and because it was demonetized at the outbreak of the Civil War after only one year in use. For these reasons, genuinely cancelled copies and covers bearing the 90c are extremely rare. Approximately 180 used examples have been certified by The Philatelic Foundation, of which only one-quarter are sound. The cancel most often seen on genuine used examples of the 90c is the New York red grid.

EXTREMELY FINE AND CHOICE. WITH A FEW EXCEPTIONS FOR RARE SHADES, THE 1866 15-CENT LINCOLN COULD WELL BE THE RAREST OF THE 1861-66 SERIES IN CHOICE ORIGINAL-GUM CONDITION.

In our catalogue descriptions, we have emphasized the rarity of 1861-66 stamps in choice original-gum condition. With the exception of the rare 5c and 24c shades, our experience shows that the 15c Black is the most difficult stamp to obtain in sound, choice original-gum condition. It is most often found without gum or disturbed gum, or the fully-gummed examples are off center. The block of six (straight edge at left), ex Caspary, Lilly and Ishikawa, is well-centered with original gum, but our search of numerous other major auction sales produced few other examples apart from the block. Therefore, this stamp could be the rarest *face-different* design of the 1861-66 series in choice original-gum condition.

The finest copy in existence is the ex-Zoellner copy, which realized \$11,000 in 1998. The stamp offered here is the second finest and has the added attraction of a colored cancel. It is followed by four others with centering that is not quite as choice. Two of the other four have not been seen in over 20 years and, therefore, their condition needs to be verified.

EXTREMELY FINE EXAMPLE OF THE 15-CENT TYPE II 1869 PICTORIAL ISSUE.

This 15c Pictorial exhibits an extremely desirable depth of color that is infrequently seen in used examples and very rarely found unused. Reflecting on past sales, we can recall only a few examples with this clarity of impression and brilliant color that retained any part of its original gum. Factoring in the superb centering, we feel confident in describing this stamp as being among the finest known examples.

- VERY FINE APPEARANCE. ONLY 91 EXAMPLES OF THE 15-CENT 1869 PICTORIAL INVERT ERRORS ARE RECORDED IN OUR CENSUS.

Our census of 1869 Inverts contains 91 examples of the 15c Invert, including three unused and 88 used (one in the British Library's Tapling collection and three No. 119c varieties). We estimate that only twelve to fifteen used copies are sound, including copies with tiny corner creases. A large number — more than half — have serious faults or repairs.

EXTREMELY FINE. A BEAUTIFUL ORIGINAL-GUM EXAMPLE OF THE 24-CENT 1869 PICTORIAL ISSUE.

The 24c 1869 Pictorial, even in original-gum condition, is not a rare stamp. However, centering and soundness are elusive qualities among examples of this issue. This stamp has color, centering and margins that appear more like its re-issue counterpart.

EXTREMELY FINE GEM. A SUPERB STAMP WITH REMARKABLY CHOICE CENTERING. THE 30-CENT 1869 IS ESPECIALLY RARE IN ORIGINAL-GUM CONDITION.

Our experience with the 1869 Pictorial Issue has shown that the 30c with grill (as opposed to Scott 121a without grill) is extremely rare in well-centered original-gum condition. Centering seems to be a challenge in this issue, and our best estimate is that 12 to 15 of the 30c exist in Extremely Fine grade with original-gum.

789 ★ **90c Carmine (155)**. Original gum, lightly hinged, well-centered, proof-like impression

VERY FINE AND CHOICE EXAMPLE OF THE 90-CENT NATIONAL BANK NOTE ISSUE.

In general, the Grilled National Bank Note Issues in superb original-gum condition overshadow their ungrilled counterparts. This is also true for the 90c. However, in addition, collectors are frequently misled by the availability of Scott 166, the 1873 Continental printing. The difference in shades is distinct, yet collectors have a tendency to under-rate the 1870 National printing. Most original-gum examples are poorly centered. This example is remarkable for its centering.

EXTREMELY FINE. THE 15-CENT 1873 CONTINENTAL IS ONE OF THE MOST ELUSIVE BANK NOTE ISSUES IN THIS GRADE OF ORIGINAL-GUM CONDITION.

Collectors who have searched for a well-centered Scott 163 with original gum know how rare it is in such condition. Off-center stamps are the norm, and original gum is a rare commodity in this issue.

- 807 ★ **30c Gray Black (165).** Original gum, lightly hinged, soft charcoal gray shade, sharp impression on fresh paper

EXTREMELY FINE. AN OUTSTANDING ORIGINAL-GUM EXAMPLE OF THE 30-CENT 1873 CONTINENTAL BANK NOTE ISSUE.

The 30c Continental is distinguished from its National counterpart by shade and the shape of the perforations, and from its 1879 American counterpart by paper. Many philatelists — even intermediate and advanced collectors — have difficulty classifying Scott 165. When it comes to naming the most elusive Bank Note stamps in choice original-gum condition, the 30c 1873 is often overlooked. However, in most serious collections, it is missing or represented by something that compromises quality. The 30-cent 1870 is frequently found filling the space for Scott 165. The 30c Continental is *extremely rare* in any original-gum condition.

EXTREMELY FINE APPEARANCE. A BEAUTIFUL ORIGINAL-GUM EXAMPLE OF THE 2-CENT PAN-AMERICAN INVERT.

According to *U.S. Stamps Series of 1901* by Silberman, three panes of 100 of the 2c Pan-American were discovered, all in 1901. The first pane was purchased on May 4, 1901 by Frederick W. Davis, an employee of Mergenthaler Linotype Company, directly from his letter carrier. On noticing the invert, he gave the letter carrier two, sold five to a fellow employee, and tried to sell the remainder on Nassau Street. He had a difficult time selling them, as dealers were convinced that many more would eventually turn up. A second pane was discovered in Brooklyn N.Y. about one week later. Three were used before the mistake was noticed. The discoverer wrote a letter to the Bureau of Engraving and Printing bringing the error to their attention, and he was told that they would be honored for postage. According to a story told by famous collector Admiral Harris in 1930, a third pane was apparently discovered in 1901 by Fred Schoenberg, a Sunday School teacher, who purchased them in New York City. He gave away four copies and sold the remaining 96 to someone representing themselves as a postal inspector, who paid him \$1,000.00 cash in small bills.

FINE EXAMPLE OF THE 4-CENT PAN-AMERICAN INVERT.

The 4c Pan-American Invert was a special printing and not regularly issued. Examples were distributed through two official channels, and the gum on the majority of stamps without "Specimen" overprint was disturbed due to its removal from mounting paper. In fact, many of these stamps are thinned or have seriously disturbed gum.

FINE EXAMPLE OF THE 4-CENT PAN-AMERI-  
CAN INVERT WITH SPECIMEN OVERPRINT.

If the reported numbers are correct, a total  
of 203 4c Inverts was released, both with  
and without the overprint. An unknown  
quantity of the 4c Pan-American invert was  
overprinted with a small "Specimen" over-  
print. Some examples, both with and with-  
out the overprint, were given away by Third  
Asst. Postmaster General Edwin C. Madden.  
When postal authorities learned of the prac-  
tice, they destroyed 194 copies and put one  
pane of 100 into the official archives. At a  
later date, 97 of these were traded for rarities  
missing from the archives.

- 1460 **3c Deep Violet, Orangeburg Coil (389).** Deep rich color, neat wavy-line machine cancel, few defects incl. sealed tear at top

A FINE APPEARING EXAMPLE OF THE RARE 3-CENT ORANGEBURG COIL.

The Orangeburg coil was made by the Post Office Department in 1911 specifically for use by the Bell Pharmaceutical Company. The 3c coil stamps were used to send samples of Bell products to physicians. Due to the quantity of mail, most were put through the first-class cancelling machine at Orangeburg, New York. The Orangeburg coil stamps' use on third-class mail, and the fact that philatelists were generally unaware of their production, accounts for their rarity.

With 1978 P.F. certificate ..... 11,500.00

- 1833 ★ **2c Carmine Lake, Ty. I (634b).** Small h.r., well-centered with balanced and exceptionally wide margins, beautiful deep dark red color that unquestionably qualifies as the Lake shade, light diagonal creases and rough perfs at top

EXTREMELY FINE APPEARING EXAMPLE OF THE 1926 ISSUE IN THE RARE CARMINE LAKE SHADE.

According to Gary Griffith's *United States Stamps 1927-1932*, (p. 18-19), there are many different 2c shades, as one would expect from a stamp printed from more than 500 plates over 11 years. The first report of the Carmine Lake shade appeared in the October 1937 issue of *Scott's Monthly Journal* when Mr. R. C. Dahlem brought a "sheet" (probably a pane) to Scott Stamp & Coin and stated five sheets were discovered in a "western" post office some months ago. Then, ten months later, in his Aug. 3, 1938 publication *Stamps*, Max Johl reported a similar find of this shade when Mr. J. M. Taggart sent him a block of twelve from Plate No. 21411 allegedly from a find of four panes in a Springfield O. post office early last year. It is possible that the two reports are of the same find. To complicate matters, neither the P.F. nor the A.P.S. has a reference copy for this shade.

THE "McCOY" INVERTED JENNY  
PROPERTY OF DR. JOSEPH L. KURTZMAN

1887

1887° ★ **24c Carmine Rose & Blue, Center Inverted (C3a).** Position 75, original gum, deep rich colors, small tear at left, some thinning, a few perfs at top right blunted

EXTREMELY FINE APPEARANCE. THIS IS THE LOWER LEFT STAMP FROM THE FAMOUS McCOY BLOCK. A WONDERFUL STAMP WITH A FASCINATING STORY.

The Inverted Jenny offered here was originally the lower left stamp in the famous McCoy block. The block was once owned by Arthur Hind, and sold at the 1933 auction of his stamps to Scott Stamp & Coin Co. It was then sold in 1936 by Spencer Anderson to Ethel B. Stewart (later Ethel McCoy). Early in the morning on September 23, 1955, at the APS annual convention in Norfolk Va., a thief broke into a protective case housing the block of four of the Inverted Jenny that belonged to Ethel B. McCoy. A scrap of mounting paper and the blank album page were all that remained in the exhibit frame when the theft was noticed. The block would never be found intact.

Three years later, the position offered here, the lower left stamp of the block, was offered by a Chicago dealer to the Weills of New Orleans. Recognizing the stamp as part of the stolen McCoy block, the Weills notified the FBI, but the single stamp's value fell below the minimum necessary for the law-enforcement agency's involvement. With no other option, the Weills returned the stamp to the dealer, who claimed that he bought it prior to the 1955 theft.

The stamp resurfaced briefly in 1970 and then again in 1977, when the Philatelic Foundation positively identified it as Position 75 from the McCoy block. By then, it was of sufficient value to warrant an FBI investigation. After its recovery and a protracted custody battle, the stamp was donated by Mrs. McCoy to the American Philatelic Research Library and was sold on their behalf in 1981, realizing \$115,000. Only one other stamp (Position 65) has been recovered since the 1955 theft.
