# Introduction to the Hall Collection of Confederate States Stamps and Covers

THIS SALE CATALOGUE PRESENTS THE MAJOR PORTION OF THE HALL collection of Confederate States, with the exception of items sold in April 2000 (Sale 823) that were kept separate from the main collection. Viewed in its entirety, the Hall collection of Confederate States is one of the most accomplished collections of this subject ever to reach the auction market.

A significant part of my personal fascination with the material is based on its provenance. The Halls were given the opportunity to acquire major sections of the Edward S. Knapp Confederate collection when it was dispersed by private treaty in 1928. The invoice shown here lists some of the remarkable items and groups purchased from Knapp through Scott Stamp & Coin. The Halls also bought items from the legendary Walcott, Ackerman, Emerson and Brown collections, both at auction and through private treaty.

The emergence of so many long-lost artifacts of Confederate philately is certain to invigorate collectors and provide critical material for study. Coincidentally, an award-winning series of articles by Leonard H. Hartmann on the Lithographed issues has been running in *The Chronicle* (Nos. 180, 182, 185 and 190). Mr. Hartmann, a careful and diligent student of the Lithographs, pondered the whereabouts of several significant items recorded by philatelists, but not seen in 60 or more years. In *Chronicle* 180, page 270, he asks about two items, "does anyone know where they are today?" Well, yes, they are lots 165 and 177 in this catalogue.

Collectors such as August Dietz, Edward S. Knapp and John H. Hall were challenged by the technical aspects of Confederate stamp production. In particular, the Lithographs presented them with many unanswered questions about how the Transfer Stones and Printing Stones were created. Some of those questions and new ones, too, continue to vex philatelists. Knapp's studies of the Misplaced Transfers and Replaced Transfers, unpublished and hidden from philately for 73 years, are unveiled in this catalogue (pages 68-75) and should fuel a field of study ignited by Mr. Hartmann's series, which explored these extraordinary and rare Lithograph varieties.

The most valuable items in the Hall collection are so conspicuous, it feels gratuitous to mention them, but I will point out one. The complete pane of Confederate Number One, offered as lot 142, is arguably the most outstanding surviving item of Confederate Philately. Along with the largest recorded blocks of United States Numbers One and Two, the Confederate pane is, in my opinion, one of the greatest items in American Philately.

This offering of the Hall collection is like opening a philatelic time capsule. I doubt anything like it will ever happen again.

## STAMPLESS PATRIOTIC COVERS

27

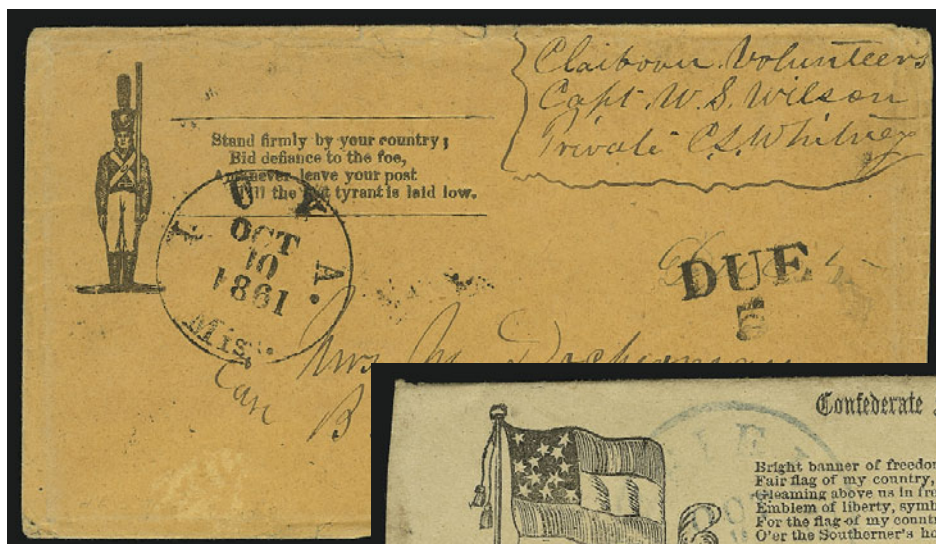

- 27 ☒ **Athens La. Aug. 30 (1861).** Partly clear strike of circular datestamp with "Paid" and "X" handstamps on **Hanging Lincoln Cartoon** cover to member of 9th Regt. Ala. Volunteers at Manassas Va., pencil docketing on back indicates 1861 year date, clear impression of printed design, edges expertly improved with right edge restored approximately one-quarter inch

VERY FINE APPEARANCE. ONLY ELEVEN EXAMPLES OF THE CELEBRATED HANGING LINCOLN ENVELOPE ARE RECORDED. AN OUTSTANDING CONFEDERATE PATRIOTIC.

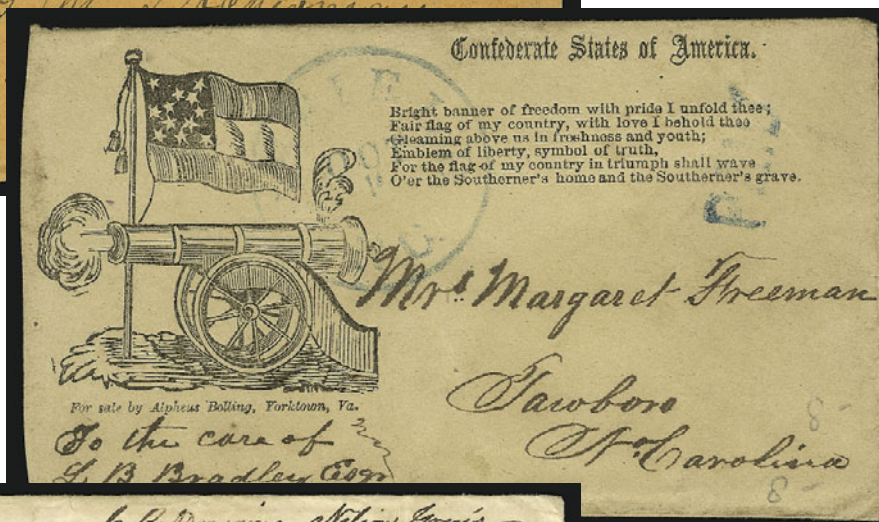

The Hanging Lincoln design is widely recognized as the most distinctive of all Confederate patriotics. In this extraordinary cartoon, President Lincoln is hanging upside down from a tree limb, with his symbolic axe and fence rail tied around his neck. The caption reads "Abe Lincoln the destroyer. He once split Rails. Now he has split the Union." To the left and right is the caption "The penalty of disregarding the constitution. Impeached, deposed, Tried and convicted" (there is a spelling correction from "diposed" to "deposed"). Standing beside Lincoln is a mustachioed Winfield Scott, labeled "Old Fuss n Feathers", dropping his sword and exclaiming "My glory is gone for ever." On the ground is the Union flag, captioned "The stars and stripes lie in the dust, Never to rise." A star at left has the caption "The southern star is rising" and the Confederate 11-star flag towers above with the caption "The stars and bars shall for ever wave triumphant." Along the bottom is the imprint "Copyright claimed. HM & WC Box 417 Nashville Tenn."

Adding this cover to the census by the late John R. Hill Jr., there are eleven genuine Hanging Lincoln patriotics (listed in date order): 1) Jul. 25, 1861, Marshall Tex. Paid 10; 2) Aug. 21, 1861, Nashville Ten., two 5c provisionals; 3) Aug. 30 (1861), Athens La. "Paid X", the cover offered here; 4) Nov. 2, 1861, Bowling Green Ky., ex Dr. Green, Siegel Sale 822, realized \$28,000 hammer; 5) Jan. 4, 1862, Nashville Ten., 5c Olive Green; 6) Feb. 20, 1862, Cumberland Gap Ten., ms. Paid 5; 7) Apr. 15, 1862, Cartersville Miss., ms. Due 5; 8) Apr. 15, 1862, Camden Miss., 10c Rose; 9) Jun. 24, 1862, Camden Miss., 10c Pale Rose; 10) date unknown to JRH, West Union S.C., ms. Due 5; and 11) privately carried and not postally used. In addition, there is a genuine envelope with fake markings and a stamp added.

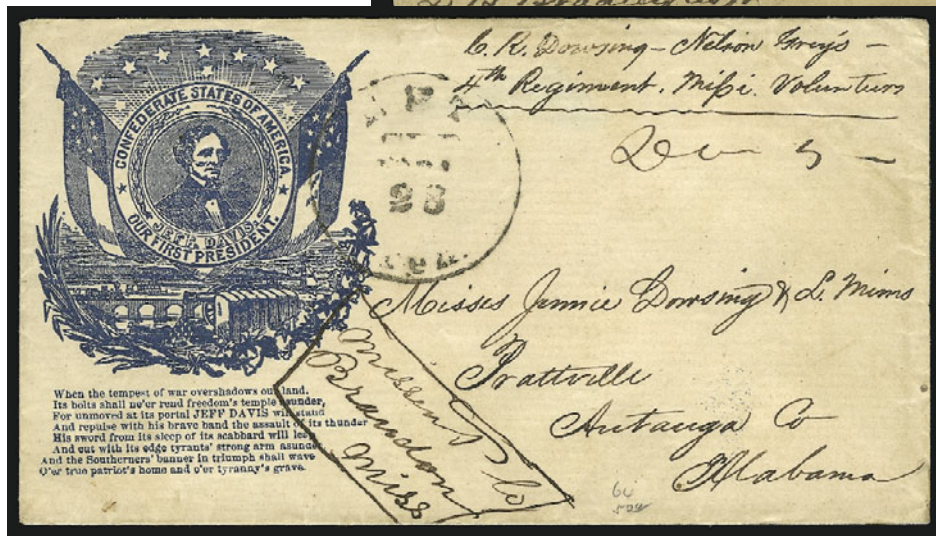

The last Hanging Lincoln cover sold by our firm (No. 4 above) was a Bowling Green Ky. stampless usage that realized \$28,000 hammer (Sale 822, lot 225). ..... E. 5,000-7,500

28

29

30

- 28 ☒ **Iuka Miss. Oct. 10, 1861.** Bold circular datestamp on orange-buff cover to Grand Gulf Miss., **Colonial Soldier** and “Stand firmly by your country. . .” verse patriotic design, soldier’s letter endorsement, “Due/5” two-line handstamp applied at Memphis, minor edgewear, Very Fine, extremely rare Confederate patriotic design, ex Ferrary ..... E. 1,000-1,500
- 29 ☒ **Enfield Va. Oct. 9 (1861).** Large blue circular datestamp with matching “Paid” on **12-Star Confederate Flag, Cannon & Verse** patriotic cover to Tawboro N.C., Very Fine ..... E. 500-750
- 30 ☒ **??? Ten. Sep. 1861 28.** Partly clear circular datestamp with yeardate between month and day, ms. “Due 5” on blue **Jefferson Davis Medallion and Verse** patriotic cover to Prattville Ala., ms. “Missent to Brandon Miss.”, endorsed by a member of Nelson’s Grays, 4th Regt. Miss. Vols., Very Fine, unusual usage ..... E. 750-1,000
- 31 ☒ **Confederate Patriotics.** Eight, incl. four used covers, two used cover fronts only and two unused, range of designs and usages incl. Cannon, Flags, mixed condition with all of the used examples faulty, still an interesting group ..... *Not illustrated* E. 300-400

POSTMASTERS' PROVISIONALS

- 32 (★) **Nashville Tenn., 3c Carmine (4AX1).** Unused (no gum), Position 5 with enormous sheet margins, vertical crease in right sheet margin, Extremely Fine ..... 150.00

33

- 33 ☒ **Fort Valley Ga., 3c Black entire (Unlisted).** Clear strikes of "Paid 3" U.S. rate, "Fort Valley Ga." control circle and "Fort Valley Ga. Apr. 12" (1861) circular datestamp on cover to New Orleans, backflap removed, rough opening at top and slightly toned

THE ONLY RECORDED EXAMPLE OF THE FORT VALLEY 3-CENT PROVISIONAL ENTIRE — UNLISTED IN SCOTT OR DIETZ.

The 3c provisionals issued by postmasters in Confederate States prior to the establishment of the Confederate postal system were recently classified as a separate group in the Scott Catalogue. This Fort Valley entire was acquired by the Halls in 1924 from Nassau Stamp Co. (initialled "JAK" by John A. Klemann) and, to the best of our knowledge, has never appeared in auction, which explains its absence from reference catalogues.

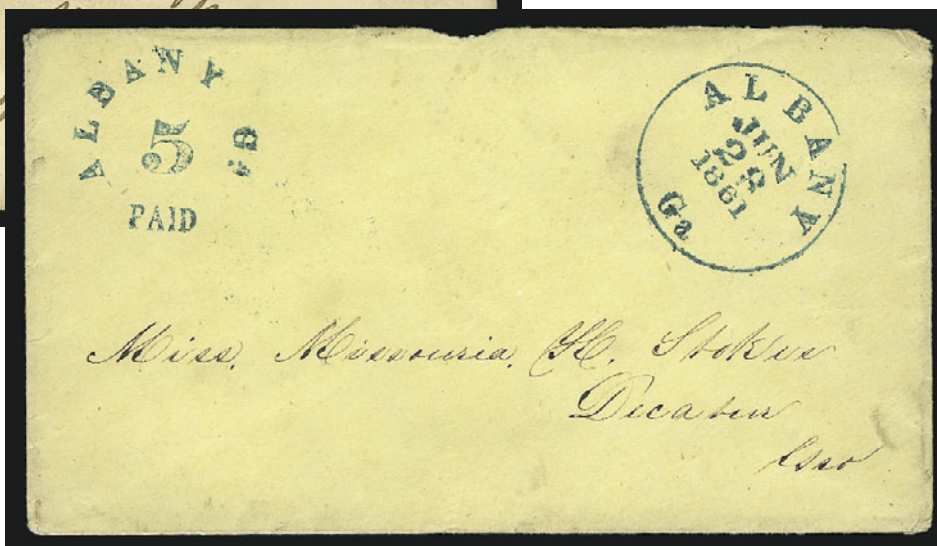

The presence of the dateless circular control mark establishes this entire's provisional status beyond doubt. Another example of the "Paid 3" (without control mark) was offered in our sale of the Kohn collection (Oct. 29, 1970, lot 35), dated Mar. 19, 1861, to the same addressee. The April 12 (1861) date on the cover offered here is, of course, the day the first guns of the war were fired on Fort Sumter..... E. 750-1,000

- 62 ☒ **Independence Tex., 10c Black on Buff, Large “10” Handstamp (41X1).** Cut with huge circular margins, very bold and clear handstamp impression (unusual for this provisional), uncanceled as always, mostly clear “Independence Tex. Jul. 31” (with spelling error in town name) on July 29, 1862 folded letter to T. W. House, Houston Tex., pinhole thru stamp and lettersheet, filing creases thru stamp have been pressed out, the stamp appears to have a repaired tear resulting from the creases

EXTREMELY FINE APPEARANCE. ONE OF FIVE RECORDED INDEPENDENCE PROVISIONALS AND THE ONLY KNOWN EXAMPLE OF THE LARGE “10” VARIETY. ONE OF THE GREATEST RARITIES OF CONFEDERATE STATES PHILATELY.

Due to confusion in distinguishing one variety from the other, the record of Independence provisional covers and corresponding catalogue listings have become somewhat muddled. Our records contain **a total of five covers** with any type of Independence provisional stamp. These are: **Large “10” (41X1 — only one kind of paper known):** 1) cut to shape on cover with Jul. 31 (1864) circular datestamp, to T. W. House, Houston, discovered by E. D. Dorchester in 1898 among the T. W. House correspondence, the cover offered here; **Small “10” and Ms. “Pd” (41X3):** 2) Dated Nov. 24 (1864), to Capt. Scott at Shreveport, ex Kilbourne, Siegel Sale 815, lot 47; 3) cut square on cover with dateless circular datestamp, to Capt. Scott at Shreveport, “Pd” and “10” very faint, illustrated in original Dietz book, p. 48, ex Caspary, Lilly; 4) cut to shape on cover with indistinct circular datestamp (month? and “18”), to Capt. Scott at Houston Tex. ex Hessel; **Small “10” Without Ms. “Pd” (41X3 var):** 5) cut to shape on cover with Apr. 29 circular datestamp (year?), to Capt. Scott at Sandy Point Tex., ex Walcott and Siegel 1982 Rarities.

Therefore, unless we have missed a cover, the Scott and Dietz listings are incorrect, and the Crown book also contains a misallocation between the two varieties (although the total number of covers, five, is correct). As far as we know, the Large “10” stamps (Scott 41X1 or 41X2) is represented only by this Jul. 31 cover (No. 1 above). Scott 41X2, the Large “10” on “Dull Rose” paper, is not represented by any of the known examples, and it seems probable that the stamp on this cover was at one time classified as Dull Rose. Scott 41X3 is represented by three covers (Nos. 2, 3 and 4 above). A variety of Scott 41X3, with the small “10” but lacking the “Pd”, is represented by one cover (Nos. 5 above), but there is the possibility that the “Pd” has faded completely.

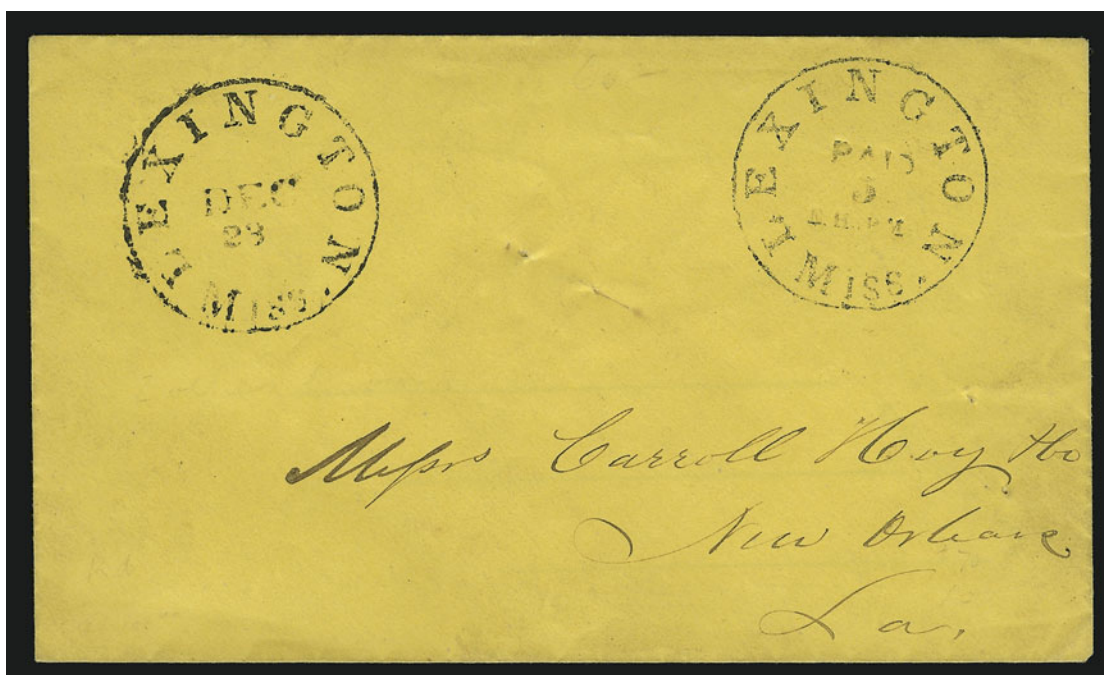

There is a typewritten notarized statement on this folded letter attesting to its discovery in January 1898. The House correspondence was acquired by E. D. Dorchester from T. W. House.

65 **Livingston Ala., 5c Blue (51X1).** Ample even margins all around, lightly struck Nov. 23 circular datestamp, upon careful examination of the thin wove paper we find a tiny sealed tear at top, a few minute scrapes and a slight crease, none of which significantly affect the appearance

VERY FINE APPEARANCE. THIS STAMP IS ONE OF THE TWO ORIGINAL DISCOVERY COPIES OF THE LIVINGSTON POSTMASTER'S PROVISIONAL. THERE ARE ONLY ELEVEN RECORDED EXAMPLES, ON OR OFF COVER.

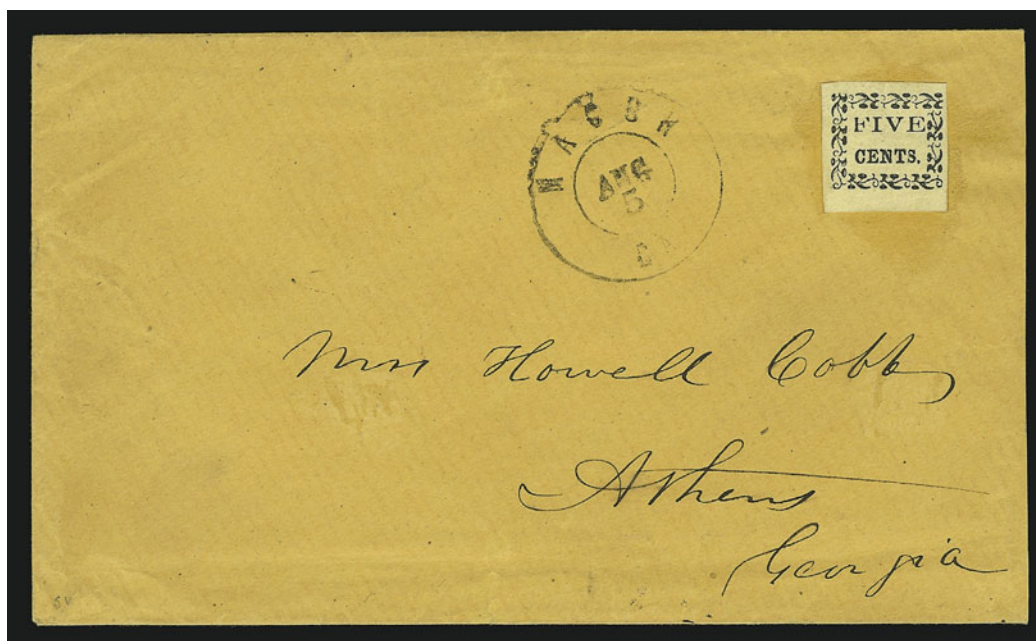

Livingston is the county seat of Sumter County, Alabama, lying on the Selma and Meriden Railroad line about 130 miles north of Mobile, near the state's western border. Official records name Stephen W. Murley as the Livingston postmaster in 1861, while other sources attribute the provisional stamp to another postmaster, Robert F. Houston. The Livingston provisional is known used in November-December 1861 and again in March 1862.

Our records contain a total of 11 stamps, including the famous and unique pair on cover (Nov. 12, 1861), 6 singles on separate covers (1861—Nov. 15, Nov. 15, Nov. 25, Dec. 10; 1862—Mar. 17 and Mar. 21), and 3 off-cover stamps. One of the single frankings, a corner-margin stamp (Nov. 25 date, ex Caspary, Antrim and Cole), was severely damaged through negligent restoration.

Only two Confederate post offices, Livingston and Mobile, issued stamps with a pictorial design. It is almost certain that the same printer was responsible for both, whose imprint "W. R. Robertson Mobile" appears on the Mobile lithographic stones. The composition of the Livingston plate is not known, but a pane of 20 subjects may be reasonably conjectured.

This stamp and another single were found in 1869 by a Southern railroad employee. Used together on one cover, they are the first Livingston provisionals discovered by philatelists and were reported in *The American Stamp Mercury* on page 110 of volume 3 (1869). In the June and July 1869 editions of *The American Journal of Philately*, J. W. Scott reported the Livingston discovery. The stamp offered here was sold to Dr. Petrie, and its mate was sold to Francis C. Foster.

Volunteers, at Norfolk Va., top left corner slightly nicked from opening, few faint toned spots

VERY FINE. THE ONLY RECORDED EXAMPLE OF THE MONTGOMERY POSTMASTER'S PROVISIONAL USED IN CONJUNCTION WITH THE RARE SOUTHERN EXPRESS COMPANY HANDSTAMPS.

Although handstamped with the Montgomery provisional, this cover was not date-stamped by the post office and appears to have been carried exclusively by the Southern Express Company (prepayment of Confederate postage was a requirement on all express mail in any case). It was probably given directly to the Southern Express Company for delivery to Colonel Lomax's regiment at Norfolk, Virginia. The circumstances of mailing are mentioned in the letter written by Mrs. Lomax to her husband. At the close of her letter, she is rushing to meet the departure of the “cars”. In a postscript she writes: “*Well Honey I hurried my letter to death to send by Mr. Faulkner and then he did not go. I will send you a box by Phill Sayre. . .*” The letter also describes whipping a female slave who appeared to be running away.

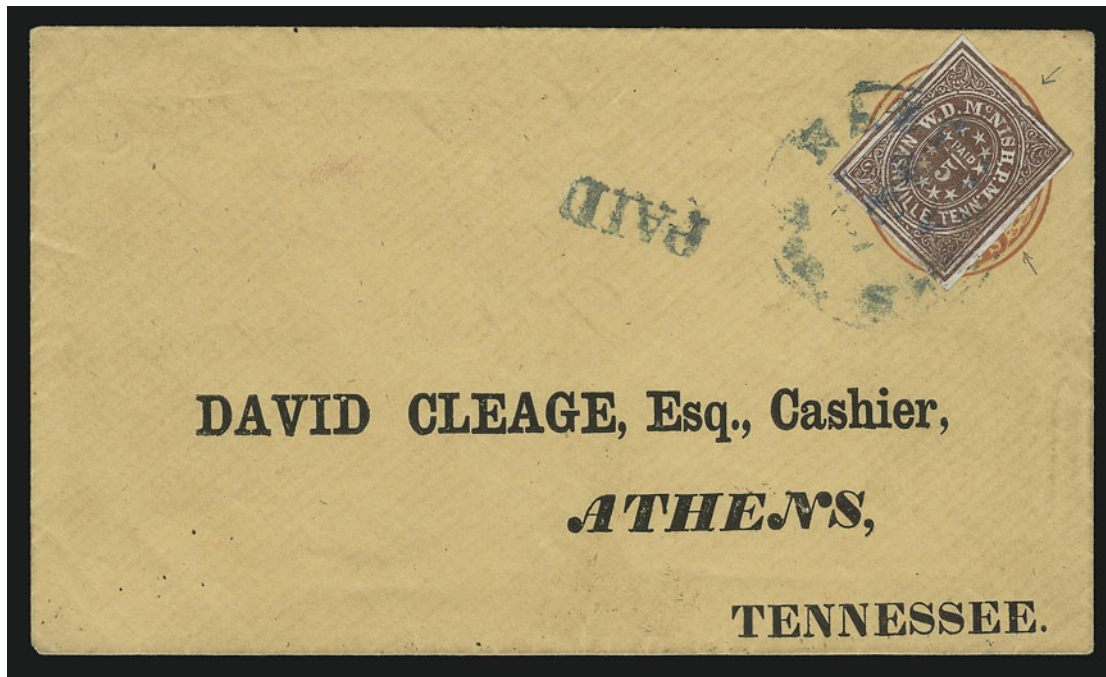

We know of four other covers with similar express markings and 5c or 10c Lithographs. All are addressed to Col. Lomax.

VERY FINE. THIS IS THE ONLY EXAMPLE OF THE PRINTED-ON-BOTH-SIDES VARIETY IN BROWN ON WHITE PAPER THAT WE RECORD.  
Based on our records of Confederate provisional rarities and experience with most of the known examples, we were skeptical about the catalogue listing for 62X3a, the Brown on White printed on both sides. Every other example of this variety is the Red Brown on Bluish (Second Printing). However, with the emergence of the Hall copy (ex 1939 Brown sale), we are able to confirm that at least this stamp is 62X3a Brown on White (First Printing). We still do not know of a 62X3a cover and believe the 62X4a Red Brown on Bluish to be the only recorded cover with this variety (see Sale 832, lot 3140)

5-CENT 1861 HOYER & LUDWIG PRINTING  
STONE 1

- 142 ★田 **5c Green, Stone 1 (1).** Complete left pane of 100 from the “Ackerman” sheet of 200, huge sheet margins all around, approximately 35 stamps with no gum or traces of gum, others have original gum, some stamps throughout the pane have minor thin spots, small sealed tears, small scuffs, horizontal creases or wrinkling, there are also a few nicks in sheet margin — these are inconsequential flaws in a relic of this kind

VERY FINE APPEARANCE. THIS IS THE ONLY SURVIVING PANE OF 100 OF CONFEDERATE STATES “NUMBER ONE”. UNQUESTIONABLY ONE OF THE MOST IMPORTANT ITEMS IN ALL OF UNITED STATES AND CONFEDERATE PHILATELY.

The 1929 edition of August Dietz’s *The Postal Service of The Confederate States of America* (pp. 102-103) contains individual photographs of the left and right panes of the full sheet of 200 that at one time belonged to Sen. Ernest Ackerman. The Ackerman sheet was divided into two panes of 100, and the right pane was further divided into two blocks of 50 (5 vertical x 10 horizontal), each block representing the group of 50 subjects on the lithographic transfer stone that was repeated four times on the printing stone of 200 (the block from the lower right pane is offered in lot 143). There is no record of another pane of 100 or larger multiple of the 1861 5c Green from Stones A-B, 1 or 2.

Bertram Poole used the Ackerman sheet as the basis for identifying characteristics of each of the 50 positions on the lithographic transfer stone (published in the *Philatelic Gazette*, October 1915). Included with this lot is a copy of a manuscript supplementing Poole’s descriptions and containing the following statement: “Poole’s descriptions were taken from a full sheet of four panes [“pane” as used here refers to the transfer blocks of 50], (the only one known) which was then the property of Mr. Klemann, and which Mr. Ackerman purchased, and in whose collection it now is. Hence I call stamps from this stone ‘ACKERMANS.’” The Halls acquired the pane of 100 as lot 211 in the Robert Laurence May 23, 1935, sale of Confederate material from the George Walcott collection (it realized \$600 in the sale).

- 143 ★田 **5c Green, Stone 1 (1).** Block of 50 from the bottom half of right pane of the "Ackerman" sheet of 200, huge sheet margins at bottom and right, full to large at top and left, original gum with patches of ungummed areas on six stamps, rich color and bright paper, creases and small faults as is to be expected

VERY FINE APPEARANCE. ONE OF THE LAST SURVIVING BLOCKS OF 50 OF CONFEDERATE STATES "NUMBER ONE". A MAGNIFICENT EXHIBITION ITEM.

As noted in the description of the unique pane of 100 (lot 142), the complete sheet of 200 that belonged to Sen. Ernest Ackerman was divided into left and right panes, and the right pane was further divided into two blocks of 50, each representing the 50-subject lithographic transfer stone that was repeated four times on the printing stone of 200. We are not currently certain of the survival of the upper half that adjoined this block of 50.

Paterson & Co., Augusta, Ga." imprint, original gum, huge sheet margins on three sides, mostly large margin at top but just touching corner stamp, creases, small thin spots and some other relatively minor faults

VERY FINE APPEARANCE. THIS HALF-PANE OF 50 WAS THE FIRST DISCOVERY OF EVIDENCE THAT THE PATERSON FIRM PRINTED CONFEDERATE POSTAGE STAMPS. A SPECTACULAR AND SIGNIFICANT PHILATELIC RELIC.

This block is illustrated in the 1929 Dietz book (p. 135), and its significance is explained in detail. Prior to 1912, philatelists were unaware that the firm of J. T. Paterson & Co. printed stamps for the Confederate government. The discovery of this Paterson imprint block by J. Murray Bartels was announced in *The Philatelic Gazette*, June 15, 1912. According to Dietz, soon after Bartel's discovery, at least two full panes of 100 came to light.

 EXTREMELY FINE. THE FINEST RECORDED BLOCK OF THE STONE Y LITHOGRAPH. VERY FEW UNUSED EXAMPLES ARE KNOWN TO EXIST.  
 Leonard H. Hartmann, in an article on the 10c Stone Y stamps (*Chronicle* 186, May 2000, p. 121), stated: "Now for the shocker — and I give this with considerable reservations as it should not be so, based on the large number of used singles. The only unused example of Stone Y that I know of are two singles and a poor condition block of 15! This general observation has been confirmed by several friends who have seen a large number of Confederate Lithographs and have commented they have never seen an unused Stone Y." Mr. Hartmann cites an unused single in Caspary and an unused block in the Wickersham collection sold by Robert Laurence in 1940 (thin spot in one stamp), neither of which was photographed. There is also mention in Dietz of an unused block of 10, which may in fact be referring to the defective block of 15.

## MISPLACED AND REPLACED TRANSFERS

This section of the Hall collection is Edward S. Knapp's study of Misplaced and Replaced Transfers, acquired by the Halls in 1928 through Scott Stamp & Coin (see p. 4). Knapp's work on the Lithographs is not very well known, because the collection was sold privately and much of his research was unpublished. However, Knapp's album pages give us insight into his profound understanding of the Lithograph issues.

To explain the Misplaced and Replaced Transfers, it is useful to review the history of plating studies of the Lithographs. The best place to start is the excellent primer on lithographic printing contained in Chapter V of August Dietz's 1929 *The Postal Service of the Confederate States of America*. Dietz was a printer by profession and understood the processes used during the Civil War period. Prior to publication of the Dietz book, a pioneering effort in plating the Lithographs was made by Bertram W. H. Poole, who published a series of articles in *The Philatelic Gazette* (1915-17). The discovery of the "Ackerman" 5c Green sheet of 200 (see lot 142) led to the precise plating of Stone 1. Gerald S. Curtis published an accurate plating of Stone 2 in *The Philatelic Gazette* (February 1918). Between 1966 and 1968, Leonard H. Hartmann published the first well-illustrated plating study of the 5c Transfer Stone in the *Confederate Philatelist*. Recently, Mr. Hartmann began a new series in *The Chronicle* (Nos. 180, 182, 185 and 190 to date) that provides an excellent overview of the Lithographs and explores some of the mysterious varieties that raise new avenues for research.

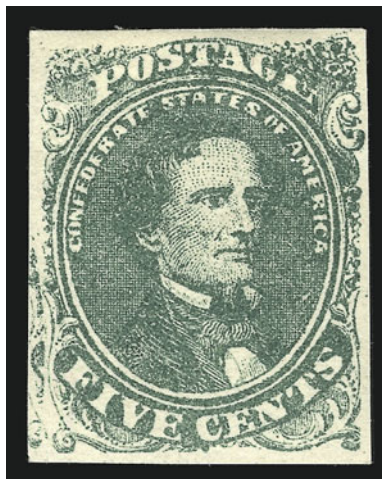

To explain the Misplaced and Replaced Transfers, we begin with the terminology used to describe certain elements of the lithographic process. Working our way backward in the process, the first term (applied to the final product) is *Sheet*, which is a complete impression of 200 stamps on a single sheet of paper comprising two *Panes*, left and right, 100 stamps each. Between the two panes is a vertical *Gutter*. The printed impression on the sheet is a mirror image of what appears on the printing plate. However, in lithography the plate is called a *Stone*, which is a slab of polished flat Bavarian limestone. For the Confederate Lithographs, two types of stones were used: the *Printing Stone*, comprising 200 subjects from which the inked impressions were made on paper; and the *Transfer Stone*, comprising 50 subjects that were repeated four times on the Printing Stone. The Transfer Stone was made from 50 individual transfers produced from a master impression, and its purpose was to allow the printer to build up Printing Stones more quickly by making only four entries. The plate positions used by Confederate specialists can refer to the position on the Transfer Stone (1 thru 50) or the Printing Stone (1-50 **Upper Left**, 1-50 **Lower Left**, 1-50 **Upper Right** or 1-50 **Lower Right**). A diagram of the 200-stamp Printing Stone is shown below with each of the four transfer groups labeled.

A Misplaced Transfer or Replaced Transfer occurs when one of the subjects on the Printing Stone is defective or damaged and must be replaced. The printer first erases the defective subject from the surface of the Printing Stone. Then, a new entry is made in its place by reproducing one of the 50 Transfer Stone subjects. If the new entry is pulled from the same corresponding position within the Transfer Stone group — for example, replacing Position 4 with Position 4 — then it is a Replaced Transfer, which can sometimes be detected by traces of the erased entry. If the new entry is pulled from a different position, then the subject is a Misplaced Transfer. Certain Misplaced Transfers have distinctive features, such as the Twin Scrolls variety (lots 222-223). Others are evident in multiples with positions out of usual sequence, such as the Positions 3-3 pair (lot 224).

The identification of the separate Printing Stones used to print the 5c Green and 5c Blue stamps is a difficult and complex task, which has been undertaken by few philatelists during the past half century. We hope that the emergence of this remarkable collection provides clues to help solve the mystery.

- 222 ★ **5c Green, Stone 2, "Twin Scrolls" Misplaced Transfer (1 var).** Position 1 entered over 10, original gum, full to large margins with vestiges of the previous entry fully visible in lower left margin, rich color, trivial small thin speck, Extremely Fine appearance, an extremely rare plate variety, listed but unpriced in Scott, ex Knapp ..... E. 500-750

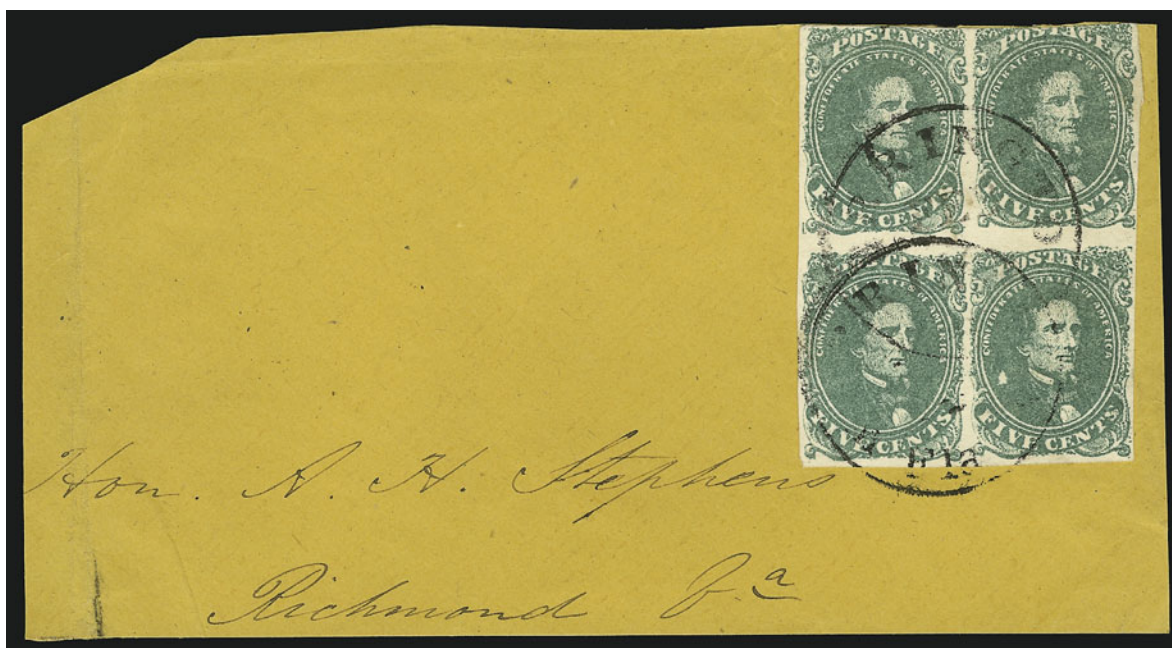

223

- 223 ☒ **5c Green, Stone 2, "Twin Scrolls" Misplaced Transfer (1 var).** Position 1 entered over 10, in vertical pair with Position 11 below, sheet margin at top, huge left margin showing the "twin" scrolls to the left of top stamp, slightly in at right, tied by "Fredericksburg Va. Mar. 27" (1862) circular datestamp on cover to Cedar Branch Ga., Very Fine, this remarkable plate variety is listed but unpriced in Scott, only a few exist on or off cover, ex Knapp..... E. 500-750

224

- 224 ☒ **5c Green, Stone 2, Misplaced Transfer (1 var).** Horizontal pair, Positions 3-3, large margins to just touched, tied by indistinct circular datestamp on part of cover to Natchitoches La., reduced and torn, the pair is Fine-Very Fine — accompanied by a block of ten of 5c Blue, Stone 2 (4) showing positions in normal arrangement — ex Knapp (with album page) ..... - 225 ☒ **5c Green, Stone 2, Misplaced Transfer (1 var).** Two Misplaced Transfer varieties contained in a **block of four comprising Positions 7-2/17-12**, three full margins, just slightly in at top, tied by two strikes of "Warrington Fla. Feb. 4" circular datestamp on front only addressed to Vice President Stephens in Richmond

VERY FINE. A PHENOMENAL BLOCK, CONTAINING THE ONLY RECORDED EXAMPLES OF THESE MISPLACED TRANSFERS.

We are unable to determine which of these positions are the Misplaced Transfers. However, it is probable that a vertical pair of transfers from Positions 7/17 were used to replace Positions 1/11 entries at the corner of the printing stone, where damage was more likely to occur.

Accompanied by an unused block of ten of the 5c Blue, Stone (2), showing the normal positions of 7/17. Both ex Knapp (album page included). ..... E. 2,000-3,000

- 226 ☒ **5c Green, Stone 2, Misplaced Transfer (1 var).** Horizontal pair, Positions 9-35, enormous margins all around including top sheet margin, tied by **blue** "Norfolk Va. Jan. 7, 1862" circular datestamp on yellow cover to Carroll Hoy & Co. New Orleans, usual filing pinholes, one of which passes thru pair, yellow cover slightly bleached

EXTREMELY FINE. ONE OF THE MOST OUTSTANDING EXAMPLES OF ANY MISPLACED TRANSFER VARIETY. THIS COVER WAS HIGHLY REGARDED BY THE LATE EDWARD S. KNAPP AND HAS NOT BEEN AVAILABLE TO COLLECTORS SINCE 1928.

The two stamps in this pair come from the 9th and 10th positions of the top row of Stone 2. However, the right impression (in Position 10) comes from the transfer copied from Position 35, which was used to replace the original entry on the printing stone after it was damaged during production. The space on the stone was not thoroughly cleaned, leaving vestiges of the original Position 10 entry in the bottom left margin, which are visible in this pair. For comparison, the cover is accompanied by a 5c Blue, Stone 2 (4) strip of three showing the normal Positions 8-9-10 and a single from the normal Position 35. Also included in the lot is a 5c Olive Green from Position 20 that shows the traces of the removed transfer in the top margin, indicating it comes from a sheet containing the Position 35 misplaced transfer.

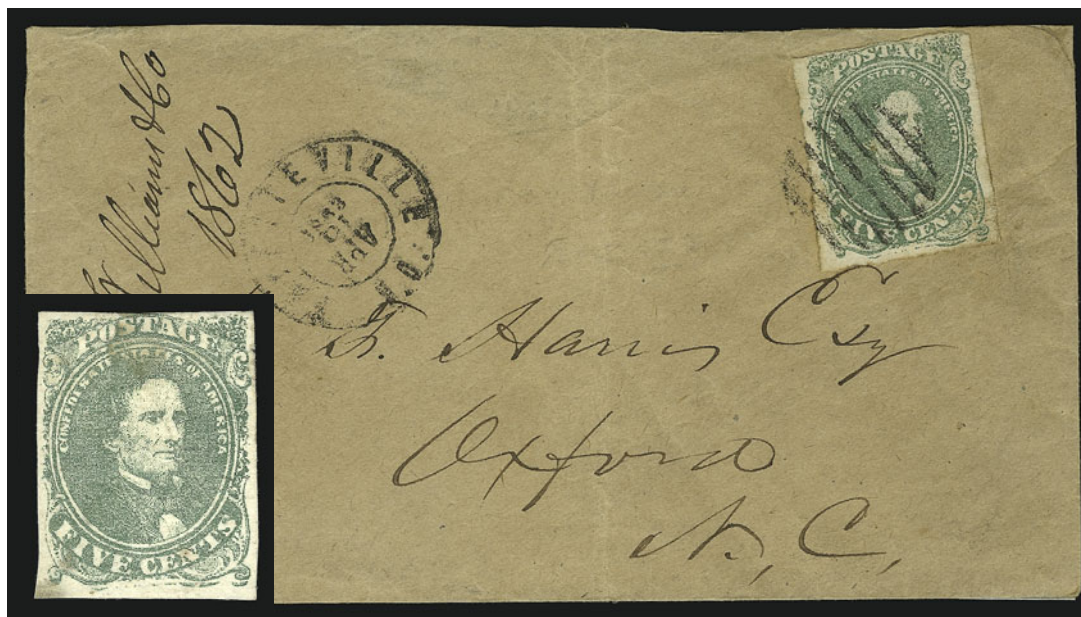

Ex Knapp (with his original album page)..... E. 1,000-1,500

- 227 ☒ **5c Green, Stone 2, Misplaced Transfer (1 var).** Position 35 in place of Position 10, right sheet margin (not possible on normal Position 35), large margins at left and bottom showing traces of removed transfer, slightly in at top, cancelled by **Tuscaloosa Star** fancy cancel, "Tuscaloosa Al. May 10" (1862) circular datestamp on **University of Alabama** green lithographed cover to Demopolis where forwarded to Greenville Ala. (addressed in red) with 5c Green (1), top sheet margin (small tears), large at sides, touched at bottom, tied by "Demopolis Ala. May 14" circular datestamp, forwarded again to Columbus Miss. but no additional postage paid

VERY FINE. THIS REMARKABLE COVER IS NOT ONLY AN UNUSUAL COMBINATION OF FORWARDING, A COLLEGE DESIGN AND FANCY CANCEL, BUT IT BEARS ONE OF THE FEW EXISTING EXAMPLES OF THE 5-CENT LITHOGRAPH MISPLACED-TRANSFER VARIETY.

Position 35 was copied and used to replace the damaged transfer occupying Position 10 on the printing stone. The right sheet margin, which only occurs along the right column of positions, and the traces of the old transfer in the bottom margin are characteristics identifying this as the Misplaced Transfer variety (Position 35 over 10).

- 230 **5c Green, Stone 2, Misplaced Transfers (1 var).** Three different: Positions **19-41** in horizontal pair tied by blue "Petersburg Va." circular datestamp on piece of advertising cover, margins cut in and sealed tear; Positions **13/30** in an unused vertical pair, no gum and faults; Positions **9-25** in horizontal pair tied by green "Monticello Ga. Dec. 31" circular datestamp on piece, margins mostly clear to ample, faint stain and small faults; accompanied by a 5c Blue, Stone 2 (4) unused vertical block of six with Positions 9-10/19-20/29-30 for comparison — all mounted on an album page from the Knapp collection — each of these items is extremely rare ..... THIS BLOCK IS THE UNIQUE 5-CENT BLUE LITHOGRAPH MULTIPLE CONTAINING SIX MISPLACED TRANSFERS.

This block of 13 and the block of 8 in lot 232 were the subject of Leonard H. Hartmann's article in *The Chronicle* (Feb. 2000). At that time, Mr. Hartmann was working from a 1925 photograph and did not know the whereabouts of these multiples or if they still existed. Both were acquired by the Halls privately from the Knapp collection in April 1928.

This block is presented on the Knapp album page, along with a used 5c Blue single, tied on piece, from Misplaced Transfer Position 40 with top sheet margin (only possible on the Misplaced Transfer). An unused strip of three and block of four are mounted to show the normal arrangement of positions.

THE ONLY RECORDED EXAMPLES OF THESE MISPLACED TRANSFERS.

As noted in lot 231, this block of 8 and the block of 13 were part of the Knapp collection acquired by the Halls in April 1928. They are unique examples of Misplaced Transfer positions.

## 10-CENT ROSE REPLACED TRANSFERS

The 10c Rose Hoyer & Ludwig can be plated to the same Printing Stone used for the 10c Blue Hoyer & Ludwig. However, Knapp determined that sometime during the life of the Printing Stone, the entire fourth vertical row and two other positions on one of the four Transfer Groups were erased and re-entered with the same corresponding positions within the Transfer Group (see diagram below). By observing doubling of the design and other constant varieties, Knapp was able to distinguish between stamps printed from the first entries on the stone and the Replaced Transfer varieties from the same positions. The pair and group lot below present collectors with an extraordinary opportunity to carry on Knapp's research.

- 401 ☒ **2c Green (3).** Two horizontal strips of five from the same row, Positions 11-15 and 16-20, lefthand strip uncanceled and affixed to back (torn upon opening and resealed), right-hand strip tied by three bold strikes of "Mobile Ala. Jul. 27, 1863" double-circle dates-tamp on face of **U.S. 3c Red Star Die entire** addressed to "Comr. Catesby ap R. Jones, C.S.N., Naval Gun Foundry and Ord. Works, Selma, Ala.", both strips have large margins to just touching design in places, rich color, strip on face creased between two stamps and in right pair, couple toned spots

VERY FINE. A REMARKABLE USE OF THE 2-CENT GREEN ON A COVER TO FAMED CONFEDERATE NAVAL OFFICER CATESBY JONES. THIS IS THE LARGEST RECORDED FRANKING WITH THE 2-CENT LITHOGRAPH.

The absence of a cancellation on the second strip on back indicates that the Mobile post office either weighed the letter and determined that it was under the half-ounce limit (for the 10c rate) or that the postal clerk never looked for additional stamps on back. The two strips definitely join together to form a complete row from the original sheet.

FLAG-OF-TRUCE

544

- 544 ☒ **Flag-of-Truce Mail from Federal-Occupied New Orleans.** Yellow cover addressed to "Mr. John S. Mitchell, Care Wolfe & Co., Mobile, Alaba(ma)", light pencil docketing "Contained letters from Wife & Will dated June 24th", ms. endorsement "*Allowed to Pass the lines*" and signed "*G. F. Shepley, Military Governor of Louisiana*", posted as a drop letter in Mobile with **2c Green (3)**, tied by "Mobile Ala. Jul. 18, 1863" double-circle datestamp, vertical crease (probably from being folded and carried in the courier's pocket), stain and erosion at lower right, stamp creased and torn from placement over top edge of cover

THE ONLY RECORDED EXAMPLE OF FLAG-OF-TRUCE MAIL SIGNED BY BRIGADIER-GENERAL G. F. SHEPLEY, MILITARY GOVERNOR OF LOUISIANA. ALSO BELIEVED TO BE THE ONLY KNOWN 2-CENT GREEN ON A COVER FROM FEDERAL-OCCUPIED NEW ORLEANS.

During the Federal occupation of New Orleans, mail between residents in the city and correspondents in the Confederacy was either smuggled or carried by flag-of-truce, usually under the auspices of the Louisiana Relief Committee. This cover is the only one known with the endorsement "Allowed to Pass the lines", and it is also the only flag-of-truce cover signed by George F. Shepley (1819-1878). Shepley was appointed Military Governor of Louisiana in June 1862 and served in that capacity until 1864. On July 18, 1862, Shepley was made brigadier-general of volunteers. Although General Benjamin "Beast" Butler is historically charged with excessively harsh actions against the resident public in New Orleans, Brigadier-General Shepley shares some of that responsibility.
