To Phonographers.

Is a philosophical method of writing the English language with an Alphabet composed of simple geometrical signs which accurately represent the sounds of words. It is written six times as fast as ordinary longhand, is equally legible, and such is its simplicity that its principles may be mastered in a few weeks, without the aid of a teacher.

"I love it for its beauty, philosophy, and its eminent practical utility."—REV. T. H. BEVERIDGE.

"Had this art been known forty years ago it would have saved me twenty years of hard labor."
